- First quality sanitary equipment in white colour.
- Set of bathroom furniture including washbasin and mirror in bathrooms.
- Acrylic white baths.
- Solid Surface shower trays in different sizes.
- Taps by "HANS GROHE" or similar brand.
- Mixer taps for bath and shower by "HANS GROHE" or similar.
- Clean water plumbing installed according to regulations with independent stopcock for each plumbed area.
- Hot and cold-water installation outlined according to regulations with cross-linked polyethylene pipes (PER).
- Soundproofed network of downpipes in housing areas.
- Collective system of the production of ACS through renewable energy system, according to current regulations.
- Community storage tanks with pressure system to guarantee uniform and continuous pressure.

KITCHEN

- Laminated doors with PVC edge.
- Frame in water repellent agglomerated wood board with PVC edge.
- Hinges with a clip system of 110° and 170° opening of triple regulation in height, width and depth.
- Drawers which pull out to the full capacity.
- Silestone work top or similar brand with upstands and splashback over the work top and below the extractor fan according to the design.
- Siemens or similar brand appliances with minimum energetic efficiency classification; when applicable A+:
 - Fully integrated fridge.
 - Fully integrated dishwasher
 - Extractor fan
 - Stainless Steel microwave oven.
 - Stainless Steel multifunction oven.
 - Induction hob.
 - White colour washing machine placed in utility area.
 - Stainless Steel sink placed under the work top, Franke brand or similar.
 - Tall chrome mixer tap, "Franke" brand or similar.

ELECTRICITY

- Electrical installation according to Electronic Regulations for Low Voltage.
- Degree of electrification "high".
- Top quality mechanisms.
- USB charging point in kitchen.
- Video intercom system.

AIR CONDITIONING

- Individual air conditioning for air-air system with return and expulsion grills in white lacquer. External units on roof and evaporator in the ceiling of the second bathroom or utility room.

SPECIAL INSTALLATIONS

- Project according to the regulations CTE (Technical Building Code), Regulation 293/2209 of Accessibility of the Andalusian Government and the Regulation 169/2011, on the promotion of Renewable Energy, saving and energy efficiency in Andalusia.
- Telecommunication installations in accordance with the Common Infrastructure Regulations for Telecommunications, adapting installations for optical fibre and Coaxial Cable to supply the homes with all digital options.

- Ventilation in homes according to CTE with individual extractors in each bathroom, integrated micro ventilation in carpentry and extraction points in ceilings of the bathrooms and kitchens.
- Soundproofing in the floor between each home, by anti-impact laminated acoustic floor.
- Mechanical ventilation in garages with fire and CO2 detectors connected to a central alarm.

LIFTS

- Lifts with access from the garages to the home and with a capacity for 6 people.
- Independent halls with garages.

COMMUNAL AREAS

- Adult and children's swimming pools surrounded by landscaped gardens.
- Salt chlorination system and interior lighting.
- Gardens with automatic irrigation system.
- Automatic garage access door opened by remote control.
- Charging points for electrical cars in garages.
- Large individual storerooms.
- Access ramp for the disabled
